KVALITET/QUALITY

Sistem menadžmenta kvalitetom (QMS) je način na koji organizacija upravlja kvalitetom. Pri tome pod pojmom kvaliteta ne podrazumevamo samo kvalitet proizvoda već i kvalitet poslovanja u odnosima sa klijentima i dobavljačima kao i kvalitet same organizacije. Zahvaljujući Standardu kvaliteta u svakom trenutku se može imati uvid u svim procesima i aktivnostima počev od nabavke, ugovaranja, realizacija proizvodnje do prodaje. Kroz procedure, uputstva i zapise i njihovo popunjavanje povećava se svest zapošljenih o standardu kvalitetom jer odgovornost za kvalitetno obavljanje posla ne može da leži samo na rukovodstvu firme.

Quality Management System (QMS) is the way the organization manages the quality. In doing so, the notion of quality does not mean only product quality but also the quality of the business relationships with customers and suppliers as well as the quality of the organization. Thanks to the quality standards in every moment can have access to all processes and activities ranging from procurement, contracting, implementation of production to sales through the procedures, instructions and records and their completion is increased awareness of those working on the standard of quality because the responsibility for the quality of work done can not lie solely with the leadership of the company.

Sistema menadžmenta zaštite životne sredine (EMS-Ecological Management System) je način da organizacija upravlja svim rizicima značajnih sa ekoloških aspekata životne sredine. Od organizacije se očekuje da sprovede politiku zaštite životne sredine kao i da utvrdi uticaje aspekata koji proizilaze iz realizacije proizvoda. Na globalnom nivou uvođenje EMS-a treba da poboljša uticaj organizacija ali i pojedinaca na životnu sredinu.

The system of environmental management (EMS - Ecological Management System) is a way to manage the organization with all the risks of significant environmental aspects of the environment. From the Organisation is expected to carry out a policy of environmental protection and to determine aspects of impacts arising from the realization of products .. Globally By introducing the EMS needs to improve the impact of organizations and individuals on the environment.

Upravlja rizicima po zdravlje i bezbednost zaposlenih na radu, OHSAS 18001, je način da organizacija eliminiše rizike po zdravlje i bezbednost na radu. Svrha OHSAS-a je da se aktivnostima u okviru organizacije u kojima se javlja rizik po zdravlje i bezbednost zaposlenih, poštovanjem propisa po OHSAS-u predvidi mogućnost pojave rizika i njihova eliminacija smanji verovatnoće njihove pojave kao i način postupanja u kriznim situacijama (razne nezgode na poslu). Na takav način organizacija upravlja rizikom.

Manage risks to the health and safety of employees at work OHSAS 18001 is the way that the organization eliminates risks to health and safety at work. The purpose of OHSAS is to be given to activities within an organization where there was a risk to the health and safety of employees, observance of the rules under OHSAS-u predict the likelihood of risks and their elimination or decrease the probability of their occurrence as well as the procedures in crisis situations (various accidents at work). In this way the organization manages risk.
